Technology, Memory, & Connectivity in Africa & its Diaspora

A Workshop with Peggy Piesche, CGS Visiting Scholar from Bayreuth University

Tuesday, November 10th
Black Resource Center - Conference Room, 12-2pm

Focusing on new stories within Africa and its Diaspora, this workshop wants to delve into the worlds of new media, video art, and experimental narrative. We will follow and explore the major images and narratives of a rich and inspiring digital space, in which both, creative and political activist movements transgress continental boundaries, connect a collective African/Diasporic experience beyond the nation-state, and re/conceptualize past futures and imagine radical alternate futures.
